Technical sheet written by the domaine :

OPTIMAL AGING: 5 to 10 years

SOILS: clay-limestone

PRODUCTION AREA: 4 ha

AGE OF VINES: 55 years

YIELD: 42 hl/ha, MANUAL HARVEST

GRAPE VARIETY: 100% Tannat

VINIFICATION: Total destemming. Pre-fermentation maceration and extraction by punching down. Fermentation lasts 30 days. Press wines are discarded. The cuvée is transferred to barrels and aged without sulfur until the following spring, when malolactic fermentation occurs naturally. This initial phase of aging without sulfur ensures the preservation of the fruit and malolactic fermentation in barrels. A perfectly integrated oak influence.
